

(a) proposed water-tank geometry (theory plan)

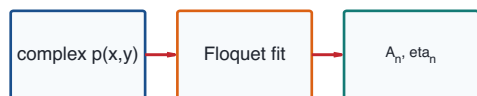

(b) proposed coarse/fine scan (no measurements)

proposed sequence only; no measured scan is implied

(c) proposed complex-field extraction (theory plan)

proposed least-squares reconstruction of complex fields

$$\eta_n = \text{Re}(k_{y,n}) |A_n|^2 / k_{y,\text{inc}}$$

theory protocol; no experimental A_n are plotted

(d) proposed ring-down check (schematic only)
